The color designs shown in this catalogue have all been photographed from the actual tile, and the three-color process has been adopted. While the reproduction is faithful, it must be stated, however, that the detail of the colors is not as accurate as it may be, owing to the limitations of the photograph color process. The general effect is correctly reproduced.

## To Our Patrons and Friends:

IN issuing this catalogue of Ceramic Mosaics, the Robertson Art Tile Co. had in mind to offer a collection of practical stock designs, trying to represent as many types of flooring as possible.

These illustrations, however, represent only a modest part of our artistic endeavors, as we constantly carry out **special designs** for work of more or less conspicuous character.

We make it a point to conform our floor and wall work to the architectural expression of the buildings in which it appears, and our Designing Department is careful to arrange all applications of borders, panels, etc., according to the architectural lines and constructive parts of the buildings.

Quite a number of illustrations representing finished work, designed and furnished

by the **Robertson Art Tile Co.**, appear in the second part of this catalogue.

We respectfully offer this collection to all parties interested in tile work, and most cordially invite correspondence.

The **Robertson Art Tile Co.** has published, and is publishing, from time to time, treatises on tile and its applications, which contain suggestions, illustrations and practical advice to tile dealers and others interested in building operations.

Our pamphlets on **Sanitary Tiling, Application of Ceramic Mosaic on Walls, etc.**, will be mailed free of charge upon application.

Suggestions for Ceramic Mosaic  
Wainscots

The artistic qualities of Ceramic Mosaic, combined with its great durability and comparative cheapness, fit it especially for its adoption in public places.
